Press Release

Signalion continues to grow LTE business in 2009

Dresden, Germany

20 years after the German unification Signalion is seen as a good example of new companies based in East Germany that founded successful businesses. Despite the worldwide economic crisis Signalion was able to increase both revenues as well as the headcount to over 100 people in 2009. Furthermore, Signalion was again able to increase its market share for its 6th year in business.

This success story was acknowledged by coverage in renowned international newspapers such as the International Herald Tribune. Based on an innovative hardware concept, Signalion products are known to offer a wide range of LTE test features, combined with the expertise of a support team that helps customers all around the world with the integration of LTE test set-ups.

"In 2010 we will see the introduction of the first LTE networks." says Dr. Hentschel, Managing Director of Signalion. "This ongoing LTE roll-out will be the basis for future growth of Signalion."
